▼ Source: Surveys conducted in October 2001, March 2004 and February 2007 of small animal veterinarians who recommended oral joint health supplements.

Cosequin® DS is a product of Nutramax Laboratories.®

Administration as a supplement for dogs

The recommended initial administration period is four to six weeks; however, some dogs may respond in a shorter period of time. The number of Cosequin® DS capsules may then be reduced to the maintenance level. The capsules can be pulled apart and the contents sprinkled on the pet's food. Wet or moist food is preferred to ensure that the pet gets the entire amount.

Dog's Weight	NUMBER OF CAPSULES	
	Initial 4 to 6 Week Administration Period	Maintenance Level ▲
10-24 lbs.*	1 daily (1/2 in the morning & 1/2 in the evening) *(under 10 lbs, 1/2 daily)	1/2 daily
25-49 lbs.	2 daily (1 in the morning & 1 in the evening)	1 daily
50-100 lbs.	3 daily (2 in the morning & 1 in the evening)	1-2 daily
Over 100 lbs.	4 daily* (2 in the morning & 2 in the evening)	2 daily

▲ Once consistent improvement has been seen, these maintenance levels may be reduced to an every other day administration. The maintenance level can also be used long-term on healthy dogs to help support their joints.
