## PHYTOVET KET FLUSH

Henry Schein® Animal Health

### **Ketoconazole 0.1%, Phytosphingosine HCl 0.01%, EDTA-Tris**

Antiseptic solution to cleanse and flush the ears and skin in dogs, cats and horses. Helps restore the dermal lipid barrier to prevent further damage to the skin.

FOR VETERINARY USE ONLY

KEEP OUT OF THE REACH FROM CHILDREN

**Active Ingredients:** Ketoconazole 0.1%, Phytosphingosine HCl 0.01%, Tromethamine (Tris), Ethylenediaminetetraacetic acid (EDTA) in a pH 8 buffered solution. Contains no alcohol.

**Properties:** PhytoVet KET Flush is an antiseptic (antibacterial and antifungal) solution for gentle cleansing and flushing of skin and ears, while also helping to restore the dermal lipid barrier to prevent further skin infections. PhytoVet KET Flush contains phytosphingosine, a pro-ceramide that helps restore the skin barrier to help in the long term management of skin disorders, and also has antiseptic properties. PhytoVet KET Flush also contains ketoconazole for the management of yeasts and fungi, in a buffered solution of ethylenediaminetetraacetic acid (EDTA) and tromethamine (Tris). The alkaline pH also helps potentiate local antibiotics such as quinolones and aminoglycosides. May be used on dogs, cats, and horses.

**Directions for Use:** Shake well before use. Apply liberally to the affected area(s). Use cotton or absorbent material to clean excess solution and wipe away debris. Do not allow the animal to lick the treated area until dry to prevent ingestion. Apply twice daily or as directed by veterinarian. Wash hands after use. Contains no alcohol.

**Precautions:** For topical use in animals only. Avoid contact with eyes. If eye contact occurs, rinse thoroughly with water and consult a veterinarian.

**Storage:** Store at controlled room temperature; protect from freezing.

Manufactured for Sogeval Laboratories, Inc., Coppell, TX, 75019
