VIRALYS® GEL

Vétoquinol USA

ORAL GEL FOR CATS

L-Lysine HCl Nutritional Supplement

Each 1.25 mL contains 250 mg of L-lysine HCl in a highly palatable base

Viralys® is a highly palatable gel. Place a small amount on cat's nose to stimulate taste interest. Once initial interest has been established, gel may be administered from a syringe or teaspoon.

ADMINISTRATION: Each 1.25 mL (1/4 teaspoon) contains approximately 250 mg of L-Lysine in a palatable base. The suggested administration for cats over 6 months of age is 1.25 mL (1/4 teaspoon) given orally twice daily. The suggested dose for kittens under 6 months of age is 0.65 mL (1/8 teaspoon) given orally twice daily. Adjust oral administration as recommended by your veterinarian.

INGREDIENTS: Purified water, L-Lysine hydrochloride, sodium carboxymethylcellulose, potassium sorbate, sodium benzoate, artificial sweetener, maple flavor, citric acid and riboflavin 5'-phosphate sodium.

USE: For use in cats and kittens as a nutritional supplement for conditions responsive to Lysine.
